

Client:

Lincoln Construction
Mr. Jim Kapros
4790 Shuster Road
Columbus, Ohio 43214

Owner:

Art Chonko (740) 587-6364

Completion Date:

2008 E

Construction Cost:

\$12,000,000

Our Fees:

\$56,000

Assignment:

Site Design
Civil Engineering
Land Surveying

**Project Experience – Land Development
Representative Experience**

Denison University Cleveland Hall

Granville, Ohio

This project is a building renovation and addition project performed for Denison University. The existing building was a historic structure that was originally intended for athletic facilities. At the time of this renovation it housed the school of art and needed drastic improvements to functionality, occupant safety, access, lighting, ventilation and technology among others. The additions made were a new studio, an administrative wing and several plazas and paths for access improvements.

JHA coordinated design efforts including meeting design requirements for LEED certification with the architects, construction manager, structural engineer, and MEP engineer. JHA's portion of the project consisted of the site development and construction plans for three building additions and renovation work on an existing building for the art school. JHA's design included offsite water and chilled waterline extensions, modification to the grading and earthwork grading plans, sanitary sewer and storm sewer design, steam tunnel relocation, pavement, parking, curbs, sidewalks and stairways. We also performed the land surveying including the boundary and topographic survey necessary for the design plans. The project is LEED registered and is on track to fulfill the requirements to become LEED Gold certified.
